New subject index

PASS Maths have recently added a new way to access the Archive. Using the Core A–level Syllabus as a rough guide, we have come up with topic headings, listed alphabetically, which link to related articles in the archive.

We hope that this will enable you to find the features you're interested in more easily, and as ever we would welcome your comments, good or bad, about how you got on with using the new index.

If you're interested in some particular area of maths, or simply want to find out more, try out the new format archive by clicking the Archive button at the top or bottom of your screen or from the link below. See what you think.

- [Articles by subject](#)

Thanks to Peter Thomas at Hills Road Sixth Form College for his help in compiling this information.

Plus is part of the family of activities in the Millennium Mathematics Project, which also includes the [NRICH](#) and [MOTIVATE](#) sites.
